

## **B-21 Polishing your King Midget**

WANT YOUR KING TO SHINE LIKE NEW?

Oh ... maybe not.

How about getting it to shine like that expensive paint job you applied after all the bodywork you did to make it look quite a bit *better* than new?

Gert Gehlhaar attended a car show recently where a sponsor offered to quickly detail his car with a new product called Who's Magic Solution; a waterless spray that makes your finish really pop.

The sales person did Gert's 1958 Rambler and Gert was sold. Says his car never looked so good. The product can be used on the paint, chrome and glass, with absolutely no streaks.

This is a California product and has been around for only a year or so. It's handy because it doesn't use any water and can be applied at the show, in the heat. It's available on this website [www.whosmagicsolution.com](http://www.whosmagicsolution.com)

Gert sent the information around to guys in our chapter. Don Nichols said, "If it beats Quick Detailer, it must be very good !!!" Gert responded he's been using the Meguiar's product for a long time and it does work well, except in the hot sun. Also it doesn't work as well on glass, leaving streaks that are hard to remove.

Does that sound like a commercial? Well, Gert's an enthusiastic guy, who has a lot of cars to keep polished. □
