

J-17 Letters: *Another Dead Speedometer Update* By Bob V.

Bob: where can I get a clip that goes inside the bearing cap for the speedometer cable? I am fabricating something but would rather not. **Chris Trautwein**

My original busted and I got a replacement from Midget Motors Supply. I don't know if Paul G. has them or not, but I got a pair thinking Don needed one and still have it. I'll stick it in an envelope and mail it. There's an article on the installation in Shop Notes (J-15) but I need to write a follow-up. The MMS wire is a poor design, having kinks instead of a smooth curve. Worse yet, because it lacks temper or something; it pulls out of the drive hole. I had to add a cotter pin to keep it tucked in there. Now it works fine. Bob

PS: It turns out this is the clip Chris was talking about, thanks to a little help and this photo from Gert Gehlhaar. It's from a car Gert sold and he doesn't know what it's for, nor do I. Anybody else? Meantime, Chris installed that wire dingus and got his speedo working. Bob ◻
